***Public Records Request***

Based on the testimony from Ivan Raiklin who testified in front of the Arizona Senate Elections and House Municipal Oversight Joint Committee Hearing on February 25, 2023.

*I request the following public records:*

- 1) Provide any and all contracts, Letters of understanding, Service and Expense Agreements or any other record between the County or State and non-government organizations that are involved/participate in registration of California voters for elections. OR, if that is too broad, then provide a list of all non-government organizations who do business with our county and the service they provide wherein I can request some or all agreement records depending on the service they provide.
- 2) Provide records documenting the process/procedures for:
  - Non-government organizations guide or instructions concerning the allowed criteria when recruiting of voters for the registration of voters in our county.
  - Process or procedures for non-government organizations to submit/transmit or upload voter information to include instruction as to how the work is to be performed, methods, program or software used to upload or transfer voter registration information including the handling of the voter's personal information.
- 3) Contracts with non-governmental organizations who provide screening of new election employees and election volunteers.

Thank You,
