SET UP AT THE VENUE

Charge your Air and make sure you have **sufficient recording time**.

Choose a location where you can **capture the whole field**.

Camera must be placed at **half-way line** at a height of 3.5m (12ft) or higher.

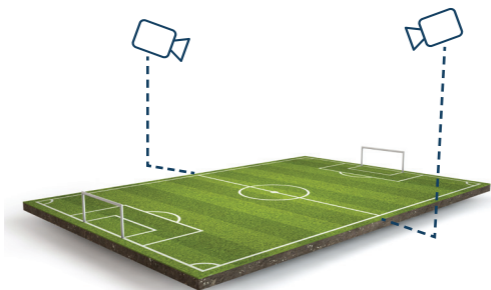

Once placed, ensure the camera does **not move** during recording and is at a **safe distance from people** moving around.

Watch our setup video

Here is an illustration of where to position the camera:

To Set Up the Mast

When setting up the mast beyond 4m (13ft) from the line, raise the mast to its full height (that is, all 3 sections).

When locating at a short distance around 3m (10ft) from the line, raise the mast to around 3.5m (12ft), which is about two sections raised.

.....

Before raising the mast, clean the lenses with the provided cleaning cloth.

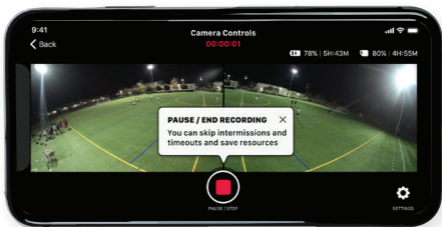

When you raise the mast, raise the top section first and then the sections beneath it.

RECORDING YOUR GAME

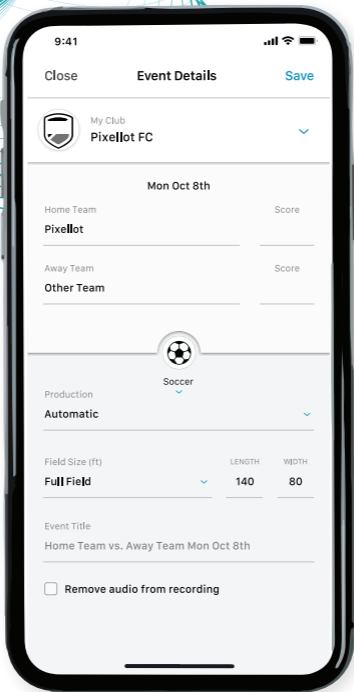

01

Before the game begins, in the **Live View** of your Pixellot Control App, tap the **record circle** to start recording.

02

When the game is over, tap the **red square** to stop recording. You may also tap the **red square** to pause a recording (i.e. for timeouts or intermissions).

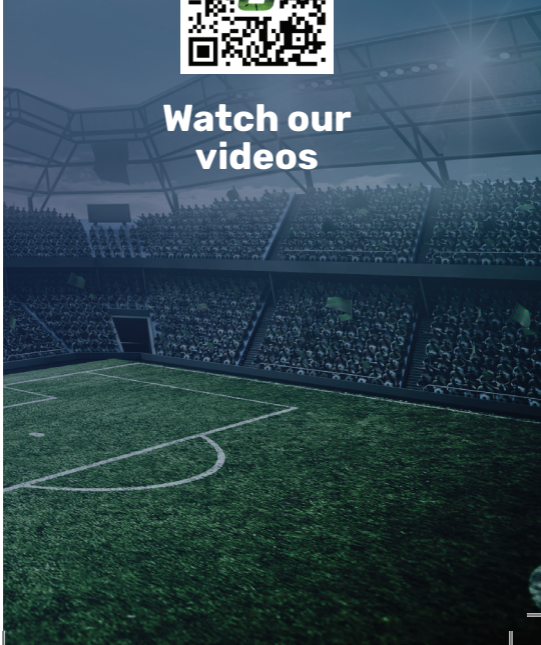

03

Enter the event details when prompted (you can add/edit them later if needed)
